

# NICHOLAS FORTUNE

## Full Stack Engineer

Tangerang, Indonesia | +(62) 877-4102-9000 | nfortune03@gmail.com

### PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience building scalable public SSR websites, web apps, mobile apps, CRM, and operational systems. Strong across frontend, backend, mobile, database, cloud deployment, SEO-focused delivery, system architecture, and agile delivery. Experienced leading engineering teams, mentoring junior developers, modernizing legacy systems, and shipping real-time product workflows with clean, maintainable code.

### TECHNICAL SKILLS

Frontend: React, Next.js, Nuxt 3, Vue.js, JavaScript, TypeScript, Tailwind CSS, Material UI, Ant Design Vue, Vite, Pinia, Micro-Frontend, Module Federation

Backend: Node.js, Express.js, NestJS, Golang, Gin, REST APIs, Clean Architecture, Nuxt Server API routes

Database and Cloud: PostgreSQL, PocketBase, CouchDB, Google Cloud Platform, Docker

Web, SEO, and Realtime: SSR, i18n, SEO metadata, sitemap, robots, Nuxt Image, Partytown, Server-Sent Events, Socket, Firebase Cloud Messaging

Integrations and Process: Xendit API, WhatsApp API, JWT, OAuth, GitHub, GitLab, Agile, Scrum, Cypress, Notion, Trello, Codex, GPT, Gemini

### PROFESSIONAL EXPERIENCE

#### Frontend Engineer | Lion Parcel | Jakarta, Indonesia

June 2026 - Present

- Developing the Nuxt 3 SSR version of lionparcel.com, Lion Parcel's public logistics website, with focus on SEO, performance, and maintainable content delivery.
- Built news and media coverage sections, reusable brand logo marquee components, and public navigation updates for content-heavy customer pages.
- Updated Malaysia public website copy and assets, corporate contact flows, and localized i18n content across customer and partner journeys.
- Handled QA-driven production fixes for OTP resend, agent wording, contact data, and public page content while working across Nuxt server API routes and composables.

Tech: Nuxt 3, Vue 3, TypeScript, Pinia, SSR, i18n, SEO, Sitemap, Robots, Nuxt Image, Partytown, Tailwind CSS, Sass

#### Frontend Developer | PLN Icon Plus | Jakarta, Indonesia

October 2025 - June 2026

- Revamped internal CRM, metering, route management, and reporting interfaces for high-traffic enterprise users.
- Implemented micro-frontend architecture with Module Federation to support independent delivery of AP2T, ACMT, RTR, CRM, and reporting modules.
- Built reusable Vue 3, TypeScript, Vite, Tailwind CSS, and Ant Design Vue components while integrating REST APIs, JWT flows, and authorized media fetching.

Tech: Vue 3, TypeScript, Vite, Tailwind CSS, Ant Design Vue, REST API, PostgreSQL, JWT, Module Federation, Git, Agile Scrum

#### Lead Fullstack Engineer | Amani Group Indonesia | Jakarta, Indonesia

September 2024 - September 2025

- Led development of Real Estate Management, Amani Sales Agent, Amani Supplier, and Amani Contractor platforms for property and construction operations.
- Architected typed frontend and backend systems using Next.js, TypeScript, Express.js, NestJS, Golang, PostgreSQL, Material UI, and GCP.
- Implemented Server-Sent Events for real-time authentication, payment, order, material tracking, and operational status monitoring workflows.
- Integrated Xendit payment flows and contractor-facing e-commerce features for construction material ordering.

Tech: Next.js, React, TypeScript, Express.js, NestJS, Golang, Gin, PostgreSQL, TanStack Query, SSE, Material UI, GCP, Xendit

## Lead Fullstack Engineer | HappyHomes | Jakarta, Indonesia

September 2023 - September 2024

- Led development of a property CRM for sales, house booking, order management, customer tracking, and payment monitoring.
- Built responsive frontend and backend architecture with React, Express.js, PostgreSQL, PocketBase, TanStack Query, and Material UI.
- Implemented Server-Sent Events for real-time payment tracking to reduce conflicting transactions and improve data accuracy.
- Maintained a React Native quality-control mobile app for on-site construction verification, photo capture, and inspection workflows.

Tech: React, React Native, TypeScript, Express.js, PostgreSQL, PocketBase, TanStack Query, SSE, Material UI, GCP, Xendit

## Fullstack Engineer | Marketa Technology Indonesia | Jakarta, Indonesia

June 2022 - September 2023

- Developed frontend and backend architecture for a CRM system serving property sales and customer support teams.
- Built chat-based lead tracking, customer profiling, WhatsApp API communication, and Firebase Cloud Messaging workflows.
- Converted the web application into cross-platform mobile and desktop experiences using CapacitorJS and Electron.

Tech: Vue 2, JavaScript, Vuex, Vuetify, Express.js, Socket, PostgreSQL, Firebase, CapacitorJS, Electron, GCP

## Frontend Engineer | Growth and Wealth Capital | Jakarta, Indonesia

September 2021 - June 2022

- Developed responsive CRM interfaces using Vue 2, Vuex, Vuetify, Tailwind CSS, and JavaScript.
- Translated product requirements into maintainable frontend features with cross-functional teams.
- Integrated WhatsApp third-party API workflows into a web-based CRM application for sales communication.

Tech: Vue 2, JavaScript, Vuex, Vuetify, Tailwind CSS, WhatsApp API

## SELECTED PROJECTS

### Lion Parcel Public Website SSR

- Developed Nuxt 3 SSR public website sections for lionparcel.com, covering news media coverage, reusable brand marquee components, Malaysia content, corporate contact flows, i18n, SEO, and production QA fixes.

Tech: Nuxt 3, Vue 3, TypeScript, Pinia, SSR, i18n, SEO, Nuxt Server API

### Real Estate Management System

- Built a property developer platform for land acquisition, permits, housing license tracking, construction progress, procurement, dashboards, and real-time status monitoring.

Tech: Next.js, Express.js, TypeScript, PostgreSQL, SSE, GCP

### Amani Contractor and Supplier Platforms

- Created contractor-facing purchasing and internal material inventory systems for construction material catalog management, ordering, logistics, and real-time tracking.

Tech: Next.js, NestJS, Golang, PostgreSQL, Material UI, Xendit, SSE

### HappyHomes CRM and QC Mobile

- Delivered property CRM workflows, real-time payment tracking, dashboards, and a mobile app for construction quality checks and photo verification.

Tech: React, React Native, Express.js, PostgreSQL, TanStack Query, SSE, PocketBase

## EDUCATION AND CERTIFICATIONS

- Hacktiv8 - Full Stack JavaScript Immersive Certification, June 2021 - September 2021
- Bonavita Senior High School, Multimedia, Tangerang, July 2018 - June 2021

## ACHIEVEMENTS

- Contributed to Lion Parcel's public website SSR migration for faster rendering, stronger SEO coverage, localized content, and production reliability.
- Engineered an ETL pipeline to migrate data from PocketBase to PostgreSQL while preserving data integrity and improving cloud resource utilization.
- Introduced scalable micro-frontend architecture for enterprise internal platforms, enabling independently deployable modules and cleaner ownership boundaries.
- Architected Server-Sent Events workflows for real-time payment and material tracking, reducing transaction conflicts and improving operational consistency.
- Led cross-functional engineering teams, mentored junior developers, and established clean code practices for web and mobile delivery.
